Original example question

Should I open my specialty coffee shop in Austin, or in Nashville or Charlotte?

WHAT THE FIGURES SHOW

Austin, TX has higher median household income, population and median home value than both Nashville, TN and Charlotte, NC, and lower 5-year population change than both. One gap is small and may not be real: 5-year population change against Nashville, TN (1 point).

These figures describe the people who live in each place. They do not measure demand for your business, competitors, rent or foot traffic, so on their own they cannot recommend a location.

Sources cited

4 of 4 key figures

Each links to its official table. This counts citations; it is not a measure of how certain the findings are.

Median household income

$93,658: $16,287 (21%) higher than Nashville, TN ($77,371); $11,590 (14%) higher than Charlotte, NC ($82,068).

Population

979,539: 289,409 (42%) higher than Nashville, TN (690,130); 75,695 (8.4%) higher than Charlotte, NC (903,844).

5-year population change

3%: 1 point lower than Nashville, TN (4%), a small gap that may not be real; 2.4 points lower than Charlotte, NC (5.4%).

Median home value

$555,300: $141,700 (34%) higher than Nashville, TN ($413,600); $169,600 (44%) higher than Charlotte, NC ($385,700).

None of these differences has been tested for statistical significance. Census figures are survey estimates with margins of error, which this report does not show yet and which are wider for smaller places. Gaps under 5% (or under 2 points for population change) are flagged as small because survey error alone often produces gaps that size. The flag is a reading aid, not a test: a larger gap can also fall within the error, especially for smaller places.

Market analysis: specialty coffee shop in Austin, TX

This section summarizes public demographic evidence for opening your specialty coffee shop in Austin, TX, compared with Nashville, TN and Charlotte, NC. It is written so it can be adapted for the market analysis section of a business plan.

Market size and growth

Austin, TX has an estimated population of 979,539. Population grew 3% between the 2019 and 2024 ACS 5-year estimates, indicating an expanding resident base. Of the 3 locations evaluated, it has the lowest five-year growth rate.

Household purchasing power

Median household income in Austin, TX is $93,658. That is the highest of the 3 locations evaluated (Nashville, TN: $77,371; Charlotte, NC: $82,068). Household income indicates how much local residents may be able to spend; it does not measure demand for your specialty coffee shop.

Property cost context

The median home value in Austin, TX is $555,300, the highest of the 3 locations. Home values are a rough signal of local property costs, not commercial rents; occupancy costs for your specialty coffee shop need to be confirmed with lease quotes for the specific site.

Comparative position

Compared with Nashville, TN and Charlotte, NC, Austin, TX leads on household income and population but trails on population growth.

Population

1	Austin, TX	**979,539**
2	Charlotte, NC	**903,844**
3	Nashville, TN	**690,130**

Median household income

2	Charlotte, NC	**$82,068**
3	Nashville, TN	**$77,371**

Median home value

1	Austin, TX	**$555,300**
2	Nashville, TN	**$413,600**
3	Charlotte, NC	**$385,700**

5-year population change

1	Charlotte, NC	**5.4%**
2	Nashville, TN	**4%**
3	Austin, TX	**3%**

Further research before committing

Count existing specialty coffee shop competitors serving the same customers in your intended trade area, and note their pricing and positioning.
Obtain two or three commercial lease quotes for suitable sites in Austin, TX to replace home values with real occupancy costs.
Gather direct demand evidence for your specialty coffee shop: customer interviews, pre-orders, a waitlist, or foot-traffic counts at candidate sites.

ACTION PLAN Included in the $79 report

What to do before you commit.

VALIDATE FIRST

Resolve the biggest risk

2 comparison markets show stronger 5-year population change.

THEN

Confirm local demand

What foot-traffic or customer-demand signal would confirm demand for your specialty coffee shop?

BEFORE COMMITTING

Verify operating economics

What are current commercial rents and occupancy costs for the exact trade area?

COMPARISON TAKEAWAYS Included in the $79 report

Where the primary market leads — and where it trails.

Nashville, TN

Median household income is $16,287 higher than Nashville, TN.

Five-year population change is 1 percentage points weaker than Nashville, TN.

Charlotte, NC

Median household income is $11,590 higher than Charlotte, NC.

Five-year population change is 2.4 percentage points weaker than Charlotte, NC.

WHAT COULD CHANGE THE CALL Included in the $79 report

WOULD STRENGTHEN THE CASE

Verified demand for your specialty coffee shop plus acceptable occupancy costs would strengthen the case.

WOULD WEAKEN THE CASE

2 comparison markets show stronger 5-year population change.

STILL UNRESOLVED

How many specialty coffee shop competitors already serve your target customers in Austin, TX?

EVIDENCE BOUNDARIES Included in the $79 report

What this report does not know yet.

ACS estimates describe demographic context, not concept-level demand.

Commercial rent, foot traffic, competition, and site-specific operating economics are not yet included.

WHAT TO CHECK NEXT

These are the questions worth answering before you act.

How many specialty coffee shop competitors already serve your target customers in Austin, TX?

What are current commercial rents and occupancy costs for the exact trade area?

What foot-traffic or customer-demand signal would confirm demand for your specialty coffee shop?
